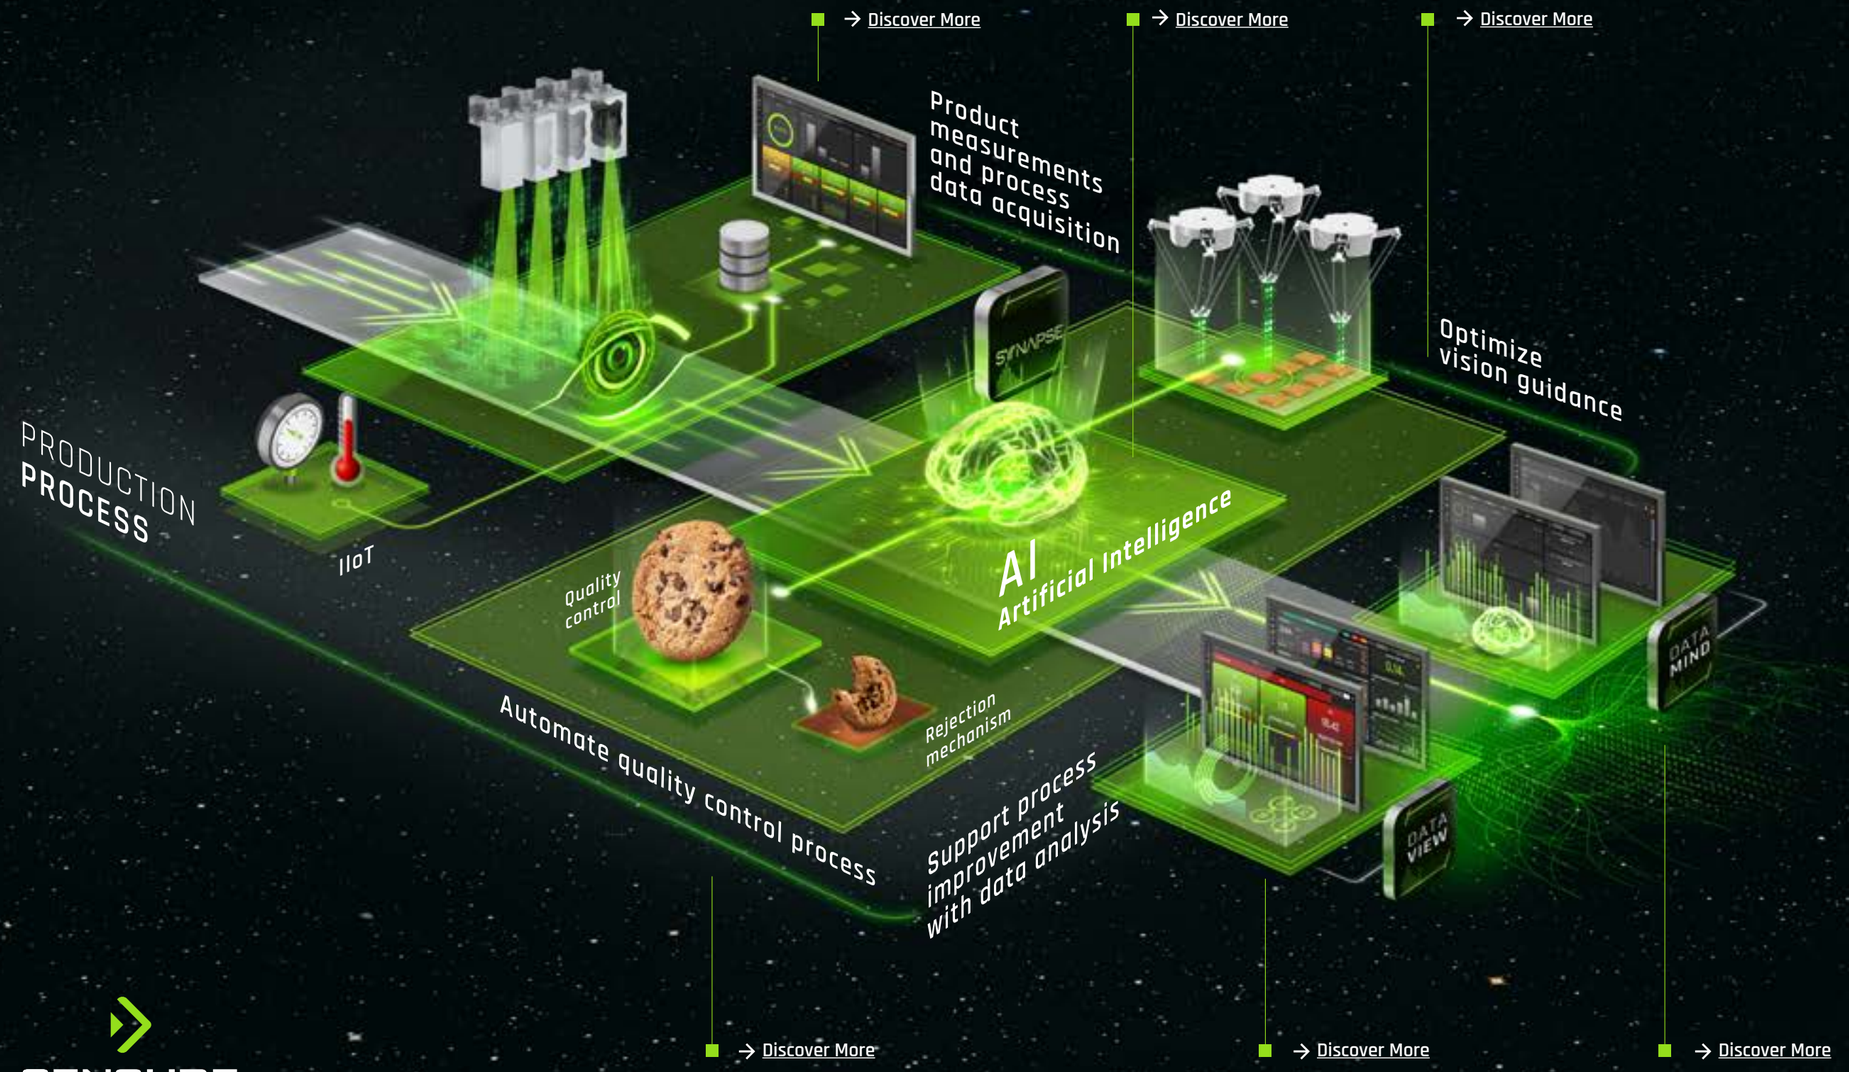
SENSURE
INNOVATION IN COMPUTER VISION

Revolutionizing Food Industry with AI

From In-Line measurements and Quality Control to Smart Factories



SENSURE

WHO **WE ARE**

Since **2007**, with **over 150 installations worldwide**, SENSURE has been delivering:

- **In-line Vision Inspection Systems powered by SYNAPSE**, the AI-based software with a self-learning approach
- **Product and process Data Analysis tools**, powered by the AI-driven software DATAVIEW and DATAMIND
- **Off-line Vision Inspection Systems**

These innovative solutions, which can also be installed on **existing lines**, are designed to:

- **Automate quality control process** and **optimize packaging efficiency** with automatic rejection of non-compliant products
- **Support process improvement** with data analytics to enhance and transform operations
- **Optimize pick-and-place operations** with vision guidance

SENSURE ensures **flexibility and adaptability** to meet a wide range of operational requirements on **highly variable products**:

- Bakery products (biscuits, crackers, crispbreads, bread, croissants, pastries, donuts, pizza, tortillas, and more)
- Snack and Confectionery (bars, chocolate tablets, pralines, candies, and more)
- Meat and Poultry
- Dairy products (cheese, ice cream, and more)
- Fish
- Other food and non-food products
